MemComputing

July 2020

As the first half of the the year has come to a close, we feel it's a good time for reflection and give a bit of perspective as to how we plan on optimizing the rest of 2020. In the midst of a global pandemic, we were, and still are being presented with unexpected hurdles and great opportunities; both of which continue to test the capabilities of our team and technology. But that's exactly what MemComputing loves; a challenge. Over the last few months, we've strengthened and expanded the capabilities of the MemComputing Virtual Machines (VMMs) to solve some of the toughest optimization problems across industry. We continue to push the limits of what is possible, and are beyond excited to begin working on the projects we have lined up in the latter half of this year.

Social Media: One of our goals is to reach 50 subscribers on Youtube by the end of this month! Help us get there by subscribing to our channel:

MemComputing Sightings

Tech Collision Event

MemComputing is pitching this week at the first ever Catalyst Accelerator Tech Collision event. The event, sponsored by the Air Force Research Laboratory's Space Vehicles Directorate, the Small Business Administration-SBIR/STTR program, and Tech Warriors Ops, is a 3-day pitch event where 32 – 40 startups and small businesses pitch innovative, dual-use space technologies to government and industry tech scouts.

Upcoming Events

Hello Tomorrow
October 22-23
Virtual

We were planning on attending the Hello Tomorrow Global Summit in March, however due to the COVID-19 crisis, this event has been postponed until October. We look forward to pitching and networking in Paris later this fall.

For the second year in a row, we have been selected as a Global Finalist from the world-renowned Hello Tomorrow Challenge. From over 5,000 applications from 128 countries, we're proud to have been named one of seven 'Advanced Computing & AI' finalists competing to win at the Hello Tomorrow Summit.

What is the Hello Tomorrow Global Summit?
The Summit welcomes 3,000 of the brightest deep tech enablers including entrepreneurs, academics, investors and corporate executives. Over two days, the venue in Paris will become a nexus of deep tech innovation, empowering entrepreneurs to build a better tomorrow.

INFORMS
Virtual
November 8-11

MemComputing is excited to exhibit at the 2020 INFORMS Annual Conference this year in Washington, D.C. INFORMS is the world's largest professional association dedicated to and promoting best practices and advances in operations research, management science, and analytics to improve operational processes, decision-making, and outcomes.

This conference attracted thousands of academic and industry experts in the INFORMS community, making it the Operations Research event of the year. Be sure to stop by booth #35 to see the MemComputing team!

SC20 Super Computing Conference
Virtual
November 16-20

MemComputing is virtually exhibiting at SC20. This is the world's largest marketplace for high performance computing professionals and provides attendees the unique opportunity to see the latest technologies, such as MemComputing, that will shape the future of large-scale technical computing and data-driven science.
