MemComputing

September 2020

As summer comes to a close, the team here at MemComputing is FALLing into the last quarter with great anticipation. We continue to make great progress with clients across a variety of industries, and our Virtual MemComputing Machine (VMM) is only growing stronger. We are currently developing and implementing advanced features and usability techniques to enhance both the performance and UI of our SaaS platform. And as always, we are making waves in the press through new interviews, podcasts, articles and more.

LinkedIn: Help us reach our goal of 500 followers! https://www.linkedin.com/company/memcomputing/

Register for free, and experience the power of the VMM yourself.

Quantum Zeitgeist Interview

QUANTUM ZEITGEIST
Interview with John Beane

MemComputing vs Quantum? Dive into our latest interview with Quantum Zeitgeist to learn more about our technology and its comparisons to quantum computing.
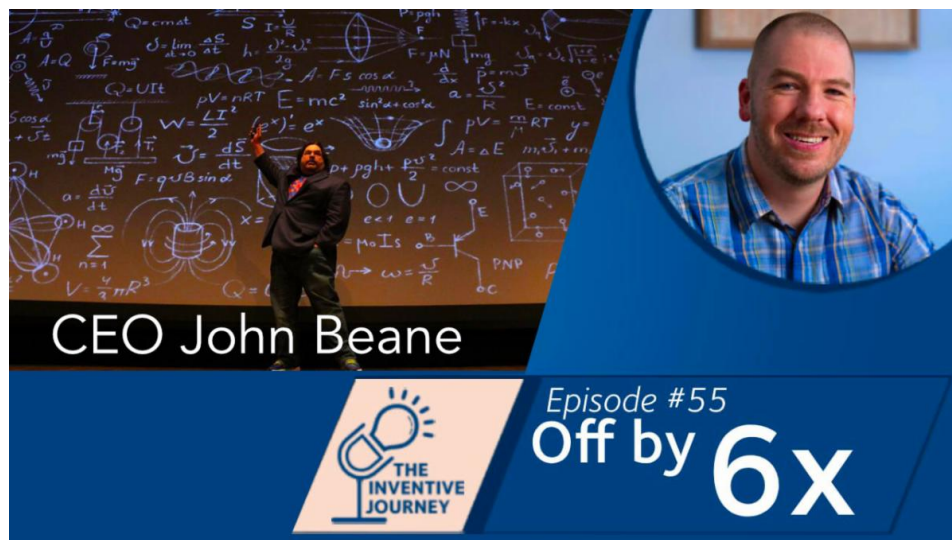

Interview

Falling Walls Finalist

We've been selected as a finalist for the Falling Walls Breakthrough of the Year award in the Science Start-Up category. More information about the conference can be found here: https://falling-walls.com/conference/

Inventive Journey Podcast

Our CEO John Beane was recently featured on the Inventive Journey Podcast where he discussed both his entrepreneurial career and the rise of MemComputing. Check it out!

Podcast

Upcoming Events

SpaceCom
October 19-29
Virtual

MemComputing will be exhibiting at SpaceCom, the Global Commercial Space Conference and Exposition - taking place online October 19-29, 2020. Learn more about this conference at www.spacecomexpo.com

Hello Tomorrow
November 16-20
Virtual

We were planning on attending the Hello Tomorrow Global Summit in March, however due to the COVID-19 crisis, this event has been postponed until November, and has gone

For the second year in a row, we have been selected as a Global Finalist from the world-renowned Hello Tomorrow Challenge. From over 5,000 applications from 128 countries, we're proud to have been named one of seven 'Advanced Computing & AI' finalists competing to win at the Hello Tomorrow Summit.

What is the Hello Tomorrow Global Summit?
The Summit welcomes 3,000 of the brightest deep tech enablers including entrepreneurs, academics, investors and corporate executives. Over two days, the venue in Paris will become a nexus of deep tech innovation, empowering entrepreneurs to build a better tomorrow.

SC20 Super Computing Conference
November 16-20
Virtual

MemComputing is virtually exhibiting at SC20. This is the world's largest marketplace for high performance computing professionals and provides attendees the unique opportunity to see the latest technologies, such as MemComputing, that will shape the future of large-scale technical computing and data-driven science.
