

March 2022

Back In Person!

Next week, our team will be exhibiting at the INFORMS Business Analytics Conference in Houston, Texas (4/3-4/5). We are excited to once again showcase our technology in person and interact with the optimization community. Feel free to stop by our booth or catch a live tutorial of the Virtual MemComputing Machine in action. More detail below.

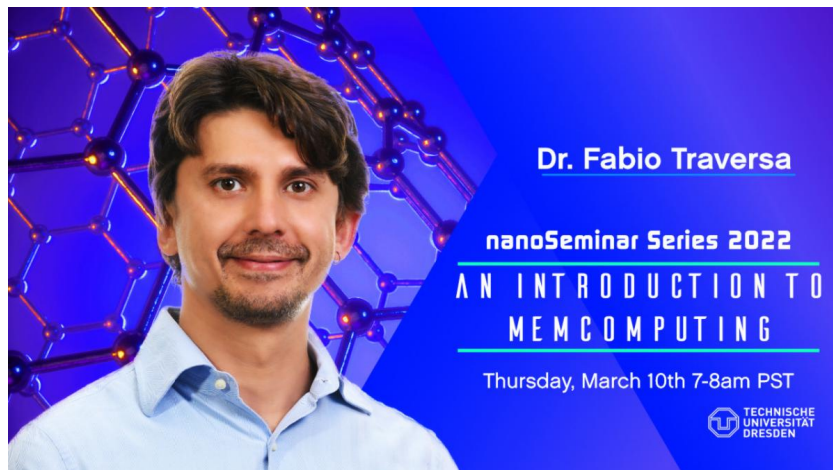

As word continues to spread across the cosmos about MemComputing, our CTO Fabio Traversa has become quite the popular speaker. Check out his latest feature below.

And in case you missed it, catch up on our latest blogs demonstrating the broad applicability of MemComputing in different industries.

Latest Presentation NanoSeminar Series

Our CTO, Fabio Lorenzo Traversa was invited to present MemComputing to the Institute of Materials Science and Nanotechnology of TU Dresden this month. His presentation educated the division about our novel computing architecture and its possible applications in materials science. A recording will be available on our website in the coming weeks.
